Instapak iMold[®]

Automated Foam Packaging System

The Proven Performance of Instapak[®] Cushioning in a Revolutionary New Automated System

Instapak iMold[®] Automated Foam Packaging System

Operations of any size can enjoy automated production of custom engineered foam packaging

Breaking the Mould

Introducing the Instapak iMold[®] Automated Foam Packaging System from Sealed Air. The Instapak iMold[®] system combines the superior protection of engineered Instapak[®] foam packaging with the efficiency of automation normally reserved for high-volume operations. The iMold[®] system significantly reduces labour and ensures that each cushion is consistently a perfect fit for your specific packaging needs.

Advanced Design for Unparalleled Quality and Versatility

The iMold[®] system is an incredibly easy to use foam-in-place machine, incorporating the latest patented technology. Utilising Foam Dispersion Technology, the system strategically dispenses the foam throughout the

bag, allowing the production of a wide variety of cushion designs. RFID technology automatically recognises mould changeovers and loads the correct cushion recipe, providing error-free operation, while the easy-to-use touch screen display minimises set up. Finally, a unique cushion ejection system frees up personnel to pack and ship, rather than monitor cushion production.

Helping You Create the Perfect Mould

Our worldwide network of 35 Package Design and Development Centres can work with you to create the ideal packaging solution for your application. We provide full-service design, prototyping, testing and tooling capabilities, along with our dedicated sales and service organisation to ensure a smooth implementation of the process.

Just-in-Time Production

The Instapak iMold[®] system has a small footprint, making it the perfect size for decentralised packaging environments. It also has the capacity to accommodate batching operations, producing cushions in the quantity you need, only when they are needed.

Specifications

Shown with optional conveyor accessory

Electrical: 380-415 VAC, 16A, 3 Phase, N, earth

Receptacle Type: CEE 17 (5- Pole, 16A) UL and CE approved

System Size: 117cm wide x 100cm deep x 165cm high

Distributed by:

IM-GB-10-11
