

 **Sealed Air**

**Mic-Pac™**

Loose Fill Packaging Material

# Free Flow Cushioning Material For Protective Packaging and Void Filling.

**Provides Simple And Cost-Effective Packaging Solution**

## 8 Distinct Advantages

### 1 Superb Cushioning

Mic-Pac™ unique shape works like thousands of tiny supporting "springs" to give your products unsurpassed protection".

### 2 Reduced Freight Cost

Weighing only 4oz. per cubic foot, Mic-Pac™ is up to 10 times lighter than other conventional packaging and dunnage materials.

### 3 Faster Production

By utilising the easy-to-use dispensing system, production can be speed up and hence cutting down labour cost.

### 4 Repeated Reuse

Mic-Pac™ is highly resilient and retains its cushioning properties even after repeated use. This means substantial savings on material costs, plus important ecological benefits.

### 5 Versatility

No need to stock cumbersome expensive custom packs. Mic-Pac™ surrounds, suspends and protects articles of every type and shape, reducing packaging material inventories and storage cost.

### 6 Safety

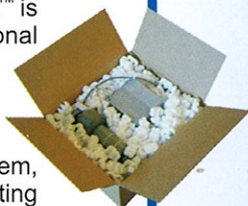

Mic-Pac™ is odorless, dust less, non-hygroscopic and chemically inert. Presents less of a fire hazard than newspaper, shredded paper and other conventional packaging materials.

### 7 Ease of Use

Mic-Pac™ offers a choice of convenient easy-to-use dispensing system. It requires minimum instruction and no special skills.

### 8 Anti-Static

Mic-Pac™ is anti-static thereby eliminating any static electricity problems present in most other materials.

## Free-Flow Dispenser

No matter how large is the production volume, the specially designed free-flow dispenser will help you realise significant labour saving and production efficiency.

A standard bag of Mic-Pac™ is approximately 14 cubic ft. in volume and 4 lbs in weight.
